SUBJECT INDEX.

Page.

Acid-base equilibrium, influence of apples on 219
Acrodynia, intradermic reaction in 157
Age, sex and season, importance of for diseases of childhood . . 232
Alimentary toxicosis, continuous intravenous theraphy in . . . 546
» » treatment of 542
Alimentary tuberculosis, pathology of, etc. 488
Alkalosis, etc., in infantile tetany 580
Allergy:
discussion on 105
heredity and 152
immunity and 281
in infectious diseases 19
non-infectious, clinical studies 36
pathological studies in bacterial 1
Amino-nitrogen, elimination in urine 209
Amyloidosis 176
Anaemia and reticulosis 511
Anatoxin, diphtheritic, immunity value of 429
Anti-rachitics, fate of in body 467
Apples, influence on acid-base equilibrium 219
Artificial feeding, progress in methods of 526
Asthma, infantile, spasmophilic element in 588
Basal metabolism
in splenomegaly 189
in hypersensitive conditions 143
Bones and teeth, chemical and histological studies of in new born 459
Breast milk:
expressed, feeding with 521
passage into of certain substances 539
Cerebral hypertension in chronic nephritis 211
Chickenpox, encephalopathy, experiments on 606
Child welfare and maternity care in Italy 277
Colon, malformation of 613
Congenital hypertrophy of liver 275

SUBJECT INDEX.

Basal metabolism
in splenomegaly 189
in hypersensitive conditions 143
Bones and teeth, chemical and histological studies of in new born 459
Breast milk:
expressed, feeding with 521
passage into of certain substances 539
Cerebral hypertension in chronic nephritis 211
Chickenpox, encephalopathy, experiments on 606
Child welfare and maternity care in Italy 277
Colon, malformation of 613
Congenital hypertrophy of liver 275

Page.
Convulsions, in early infancy, aetiology of 572
Croup, suction in 404
Deficiency states and milk 392
Diabetes, renal and renal rickets 479
Diastolization, for nasal blockage 246
Diphtheria:
anatoxin, immunizing value of 429
experiments with serum on animals 423
heart failure in 414
malignant, human serum in 433
Dolichocolon 613
Eczema, infantile, treatment of 147
Egypt, prevalence of rickets in 443
Encephalopathies in metabolic disorders 601
Encephalopathy, chickenpox, experiments on 606
Enterococcal sensitization 145
Epilepsy, prognosis and treatment 566
Fatigue and malnutrition 138
Fat metabolism in infants 165
Febrile temperatures, qualitative differences in 135
Feeding, artificial, progress in methods of 526
Fruit, physico-chemical properties of, etc. 219
Glycocoll in treatment of progressive muscular dystrophy . . . 593
Glycogen, metabolism, disturbances in 162
Gurwitz phenomena in childhood 243
Haemoglobin metabolism in serum disease 501
Heart failure in diphtheria 414
Heine-Medin disease, ultravirus for treatment of 589
Heredity and allergy 152
Hydrogen ion concentration in urine in infancy 207
Hypertrophic pyloric stenosis, familial and late 562
Hypertrophy of liver, congenital 275
Hypersensitive conditions, basal metabolism in 143
Hypertension cerebral, in chronic nephritis 211
Immunity and allergy 281
Infantile eczema, treatment of 147
Intravenous therapy, continuous, in alimentary toxicosis 546
Iodine in blood in rickets 473
Iron metabolism in childhood 507
Italy, maternity and child welfare in 277
Liver, congenital hypertrophy of 275
Malnutrition and fatigue 138
Maternity and child welfare in Italy 277
Measles, studies in 408

Page.
Meningococcal septicaemia 160
Metabolic disorders, encephalopathies in 601
Metabolism
fat, in infants 165
glycogen, disturbances of 162
of haemoglobin, in serum disease 501
iron, in childhood 507
Milk:
deficiency states, and 392
discussion on diseases conveyed by, etc. 369
diseases conveyed by 286
modifications of protein and fat, etc. 381
prescorbutic conditions and 376
prophylaxis of diseases conveyed by 324, 344
saprophytes of 299
Muscular dystrophy, progressive, glycocoll in treatment of . . . 593
Myxoedema, in childhood, thyroid treatment 213
Nasal blocage, treatment by diastolization 246
Nephritis, chronic, cerebral hypertension in 211
Nephrosis, and sinusitis 249
Newly-born, ovarian hormones, effect on 277
Ovarian hormones, effect on newly-born 227
Phosphorus, retention, etc., in infantile tetany 580
Poliomyelitis, ultra-virus for treatment of 589
Prophylaxis, of tuberculosis 485
Pyloric stenosis, familial and late 562
Rickets:
fate of anti-rachitics in body 467
interference with specific healing of 447
iodine in blood in 473
prevalence in Egypt 422
renal and renal diabetes 479
thyroid in pathogenesis of 473
Renal rickets, and renal diabetes 479
Reticulosis and anaemia 511
Scurvy, prescrobutic conditions and milk 376
Season, sex and age, importance of for diseases of childhood . . 232
Sensitization to enterococci 145
Septicaemia, from meningococcus 160
Serum, adult in whooping cough 400
Serum disease, haemoglobin metabolism in 501
Serum, human, in malignant diphtheria 433
Sex, season and age, importance of for diseases of childhood . . 232
Sinusitis in nephrosis 249

Page.
Spasmophilic element in infantile asthma 588
Splenomegaly, basal metabolism in 189
»Spleno-pneumonic» type of tuberculosis 492
Syphilis, in third generation 498
Teeth and bones, chemical and histological studies of in new born 459
Tetany, infantile, phosphorus retention and alkalosis in 580
Thyroid in pathogenesis of rickets, etc. 473
Thyroid gland treatment in myxoedema in childhood 213
Toxicosis:
alimentary, continuous intravenous therapy of 546
alimentary, treatment of 542
Tuberculosis:
pathology, etc. of alimentary 488
prophylaxis of 485
»spleno-pneumonic» type 492
Ultra-violet
light, and elimination of amino-nitrogen in urine 209
radiation, Gurwitz phenomena 243
Ultra-virus in Heine-Medin disease 589
Urine:
elimination of amino-nitrogen in 209
hydrogen-ion concentration in 207
Varicella, encephlopathy, experiments on 606
Whooping-cough, specific adult serum in 400

INDEX OF SPEAKERS IN ALPHABETICAL ORDER.

H. R. H. The Duke of York XXIX.

Allaria, G. B. 324.
Armand-Delille, P. F. 491, 492.

Baar, H. 413, 433, 578, 587, 600.
Barla-Szabó, J. 589.
Barlow, Sir Thomas XXXII, XXXVII.
Beck, A. 593.
Benedict, H. 433.
Bernfeld, A. 246.
Bessau, G. 299.
Blechmann, G. 157.
Bock, H. 386, 488, 492.
Bogin, M. 176.
Bormann, von 423.
Briskas, S. 143.

Cassoute, E. 613.
Ceresole, E. 152.
Clément, R. 143.
Cohen, C. XXXIX, 160.
Collis, W. R. F. 105, 497.
Creveld, S. van 162.

Davison, W. C. 387.
Debré, R. 123, 423.
Deering, H. 473.
De Toni, G. 113, 479.
Dreyfus-Sée, G. 539, 588.
Drucker, P. 587.
Duzár, J. 391.

Eckstein, A. 571, 601, 606.
Epstein, B. 521.
Ernberg, H. 108.

Fanconi, G. 579, 600.
Fauli, M. 207.
Feer, E. 152, 372.
Feierabend, 429.
Feldman, W. M. 403, 578.
Frank, M. 227, 232.
Frontali, G. 381.

Gittins, R. J. 511.
Giuffré, M. 207, 209.
Graham, S. 572.
Grayzel, H. G. 176.
Greenwald, H. M. 276.
Gröer, F. von 111.

Hamburger, F. 18, 491, 571.
Hamill, J. M. 369.
Hess, A. F. 246, 467, 479.
Holt, L. E. 165.
Huguenin, R. 492.

Jacobi, M. 176.
Jemma, R. 277.
Jundell, I. XXXVII, 398, 400, 403.

Karelitz, S. 546, 579.
Kirk, C. M. 165.
Kiss, P. von 414, 600.
Kohn, J. L. 273, 407.
Kramer, B. 164, 176, 458, 466, 579.
Krompaszky, T. 232.

Lapage, C. P. 152.

Lardé 539.
Leconte, A. 157.
Lereboullet, P. 344.
Lesné, E. 143, 539.
Lestocquoy, A. 492.

Mai, H. 243.
Marynowska-Kaulbersz, H. 219.
Maule, C. 446.
Mercurio, R. 281.
